The Selkirk® Model EFC Expandable Flexible Gas Vent Connector is designed to simplify connections between gas-fired appliances and rigid Type B Gas Vent.

- Simple connection between appliance and Type B vent
- No elbows required
- Expands 1' to 3' or 2' to 5'
- Integrated Draft Hood Connector
- Limited Lifetime Warranty
- 360° Flexibility

**Part No.'s 3EFC-3 and 4EFC-3**
Part No.'s 3EFC-3 and 4EFC-3 capable of extending from 1' to 3', Part No.'s 3EFC-5 and 4EFC-5 can extend 2' to 5'
The Selkirk® Model EFC Expandable Flexible Gas Vent Connector is designed for use with gas–fired appliances equipped with draft hoods and other appliances listed for use with Type B Gas Vent.

This Model EFC Expandable Flexible Gas Vent Connector system eliminates the need for elbows and greatly simplifies most gas appliance vent installations.

The Model EFC is available in 3" & 4" diameters and can expand from one foot to three feet or from two feet to five feet. Ask your sales associate for details.

Typical EFC Flexible Gas Vent Connector Installations.

- OFFSET TO CEILING
- 90° OFFSET W/TEE
- TO THE WALL
- COMBINED VENT TO CEILING
