

DIKAPT WIND-KING

ANTI-DOWNDRAFT CAP

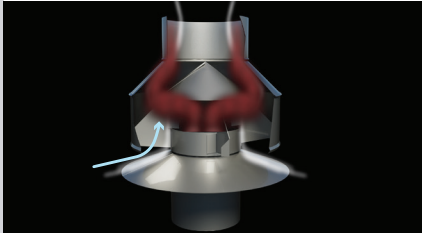

DIVERTS WIND | DIVERTS RAIN | DIRECTS FLUE GASES

Omni-directional venturi design moves rain and wind out of the cap to ensure normal flow of hot gases. Proven design for use in harsh climates and all weather conditions. For solid-fuel chimneys.

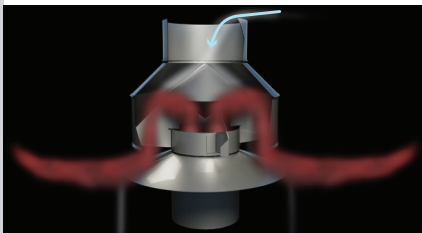

NOW UL APPROVED ON CLASS A CHIMNEYS TO UL 103HT for use with Selkirk Ultra-Temp®, Selkirk SuperPro®, and AmeriVent TLC® chimneys.

As rain enters from the top, DIKAPT diverts water and allows flue gases to exit.

When wind enters from the bottom, flue gases flow up and out of the DIKAPT.

Even if wind enters from the top, DIKAPT ensures flue gases flow out.

AVAILABLE IN 5"- 8" DIAMETERS
Wide bottom skirt fits chimneys with 1" or 2" wall thickness.

EASY TO INSTALL & REMOVE FOR INSPECTION & CLEANING
Great after-market cap solution for chimneys with downdraft or replacement issues.

HEAVY DUTY CONSTRUCTION
Built with high-quality 300 Series stainless steel for long-life and durability.

SMART CHOICE LIFETIME LIMITED WARRANTY
Covers defects in material and workmanship.
